PROFESSIONAL SUMMARY

Full-Stack Developer with a proven track record since 2022 building systems that are actually used — not just portfolio pieces. The products I've built are actively used by a government agency (BPS Kepulauan Riau) to support the 2026 Census, delivered ahead of deadline, and received direct commendation from supervisors. Proficient across the full stack — from frontend (React, Vue, Next.js) to backend (Laravel, Node.js, Go) — with data analysis capabilities using Python and Looker Studio. Currently pursuing a Bachelor's degree in Informatics Engineering at UMRAH with a GPA of 3.43, while actively contributing as a lab assistant and leading an application development team.

SKILLS

Frontend: React, Vue.js, Svelte, Next.js, TypeScript, Tailwind CSS, Flutter, Dart

Backend: Node.js, PHP, Laravel, CodeIgniter, Python, Go (Golang)

Database: PostgreSQL, MySQL, Redis, Prisma

DevOps & Tools: Docker, Nginx, Git, GitHub, Figma, Canva

Data & AI: Looker Studio, Pandas, Metabase, Google Sheets, Firebase

WORK EXPERIENCE

Computer Networking Lab Assistant

Feb 2026 – Jun 2026

Universitas Maritim Raja Ali Haji (UMRAH) — Tanjungpinang

- Guided students through every computer networking lab session, ensuring understanding of concepts and infrastructure troubleshooting skills.
- Designed lab scenarios and assessment rubrics to objectively measure participants' technical competencies.
- Entrusted by the supervising lecturer as a permanent assistant — a testament to a strong academic record and technical communication skills.

IT Web Developer & Data Analyst

Jan 2026 – Mar 2026

BPS Provinsi Kepulauan Riau — Internship

- Built the BPS Kepri Dashboard from scratch, completed ahead of deadline — the dashboard was directly presented and reviewed by the Head of BPS Kepulauan Riau, BPS RI, and the Minister of Home Affairs as part of the preparation for the 2026 Economic Census.
- Designed the Tanjak SAKERNAS Dashboard with Google Looker Studio integration to visualize employment data from thousands of respondents — received direct commendation from supervisors for the quality and accuracy of the output.
- Processed and analyzed regional statistical data at the scale of thousands of records using Python (Pandas) and Google Sheets — accelerating processes that were previously done manually.

Frontend Developer

Nov 2025 – Jan 2026

UMRAH Faculty Research Team (PKM)

- Led frontend development of UMKM Video Platform — a short-video digital promotion platform (TikTok-style) to empower local small and medium businesses.

- Built a responsive and performant UI using React.js and Tailwind CSS, integrated with a Laravel and MySQL backend in a cross-disciplinary team.

Data Analyst & Administrator

2024 – Present

Posyandu Terintegrasi

- Managed and analyzed community health data to support routine reporting and monitoring of posyandu (community health post) programs.
- Automated data processing workflows using Google Sheets, reducing manual input time and minimizing reporting errors.

IT Support

Jan 2022 – Jun 2022

PT. Pelindo (Persero) Regional 1 Tanjungpinang — Internship

- Maintained the reliability of network infrastructure and operational IT systems in a port environment with minimal downtime.

Independently handled hardware and network troubleshooting, supporting the smooth daily IT operations of the corporation.

SELECTED PROJECTS

Dashboard Kepri BPS — Full Stack Developer — BPS Provinsi Kepulauan Riau

- Built a strategic economic indicator system for Kepulauan Riau from scratch, completed ahead of deadline — directly reviewed by the Head of BPS Kepri, BPS RI, and the Minister of Home Affairs in preparation for the 2026 Economic Census.

Tech: HTML5, CSS3, JavaScript

Smart Task — Team Lead & Frontend Developer

- Led the development team for an AI-adaptive task management application. Designed the Flutter frontend architecture and coordinated integration with a high-performance Golang backend. (In Progress)

Tech: Flutter, Go, PostgreSQL, Redis, Firebase, Google

Aero Price Monitoring Platform — Frontend Developer

- Built an airline ticket price monitoring dashboard with scheduled & manual scraping, daily price history, and time-series analysis — helping users make data-driven purchase decisions based on historical data.

Tech: Next.js, Tailwind CSS, FastAPI, PostgreSQL, Docker

Dashboard Tanjak SAKERNAS — Data Analyst & Looker Studio Designer

- Designed an interactive BPS employment dashboard integrated with Google Looker Studio featuring a glassmorphism interface — transforming data from thousands of respondents into insights easily readable by policymakers.

Tech: HTML5, CSS3, JavaScript, Looker Studio

EDUCATION

B.Sc. in Informatics Engineering

2023 – Present

Universitas Maritim Raja Ali Haji (UMRAH) — Tanjungpinang

Focus: Software Development & Data Analytics | GPA: 3.43 / 4.00

Software Engineering (Vocational)

2020 – 2023

SMKN 1 Bintan Timur

Fundamentals of programming, databases, and application development | Average Score: 88.18
